

Ahmed Maged Anan

Frontend Developer — Angular Specialist

Frontend Developer specializing in Angular, with a track record of building production-grade, high-performance, and accessible web applications from the ground up — from architecture and API integration through to live deployment. Strong academic foundation in Business Administration and Financial Analysis, with a continuous focus on modern engineering practices and design quality.

My Portfolio

TECHNICAL SKILLS

Angular (v17–22)

TypeScript

JavaScript (ES6+)

Signals & Zoneless

RxJS / NgRx

Angular Material

PrimeNG

Tailwind CSS

Bootstrap

SASS / SCSS

HTML5 & CSS3

SSR & Prerendering

REST API Integration

Stripe Integration

i18n / RTL

Figma & Postman

UI/UX Development

SOLID Principles

Unit Testing (Jasmine)

Git & GitHub

Vercel Deployment

EXPERIENCE

Front-end Web Developer — Freelance Team

Apr 2025 – Present

- Engineered dynamic, responsive user interfaces with Angular and Tailwind CSS, ensuring seamless cross-browser compatibility.
- Collaborated with cross-functional teams to integrate robust APIs and optimize application performance.
- Spearheaded UI/UX enhancements, delivering intuitive and visually compelling user experiences.
- Designed modular, reusable components to streamline development and ensure scalability.
- Leveraged Git for efficient version control and collaborative code management.

Front-End Internship — Web Master

Feb 2025 – Apr 2025

- Gained hands-on experience in HTML, CSS, JavaScript, and responsive design while building real-world projects, with guided mentorship and interactive workshops.

Front-End Internship — Code Alpha

Nov 2024 – Jan 2025

- Focused on HTML, CSS, and JavaScript to build responsive, user-friendly web interfaces and experiences.

PROJECTS

KingMart — Luxury E-Commerce Platform

- Architected a full-featured e-commerce platform in Angular 22 (Signals, Zoneless change detection, OnPush by default), built around a custom "quiet luxury" design system with a bespoke dark mode and full Arabic/English RTL support.
- Implemented Signal-based Cart and Wishlist services with SSR-safe auth guards and return-URL redirects, a Stripe-integrated checkout flow, a product reviews module, and a custom quantity stepper that replaced PrimeNG's InputNumber after a runaway-value bug. Shipped as prerendered pages plus client-rendered dynamic routes on Vercel.

Technologies: Angular 22, TypeScript, Tailwind CSS v4, PrimeNG 22, Stripe, Prerendering

Tawasol — Social Media Platform

- Built a LinkedIn-style social platform end-to-end in Angular 22 (Zoneless, Signals, SSR) — authentication, a filterable infinite-scroll feed, user profiles with follow/suggestions, threaded comments with likes and replies, bookmarks, and live notification badges backed by real REST APIs.
- Raised interface quality through a unified design-token color system audited for WCAG AA contrast across both light and dark themes, skeleton loading states, semantic accessible markup, and full Arabic/English RTL localization; shipped to production with a live Vercel deployment.

Technologies: Angular 22, TypeScript, Angular Material, Tailwind CSS v4, Server-Side Rendering, REST APIs

OOP-Based Browser Game

- Built an interactive browser game in vanilla JavaScript using Object-Oriented Programming principles (ES6 classes, encapsulation, inheritance) to structure game state and logic, integrated with a public API for dynamic content.

Technologies: JavaScript (OOP), HTML5, CSS3, REST API Integration

EDUCATION

Route Academy

Jun 2024 – Feb 2025

Front-End Development — Angular Track

Al-Azhar University

Sep 2019 – May 2023

Business Administration and Strategic Marketing — Grade: Good

LANGUAGES

Arabic: Native | English: Very Good (Professional Working Proficiency)

SOFT SKILLS

- Creativity & Design:** Designing visually appealing, user-friendly interfaces.
- Problem Solving:** Strong analytical skills in identifying and resolving complex issues.
- Communication:** Active listening and strong collaboration with cross-functional teams.
- Technical Breadth:** Solid grasp of both software and hardware fundamentals underpinning web development.
